

# NOVEMBER 17, 2017 2PM-4PM SEGA LAB OPEN HOUSE

Socio-Environmental and  
Geospatial Analysis (SEGA) Lab

**A place where faculty and students integrate cutting edge technology into research and the classroom setting!**

The SEGA Lab in 300 Prospect Hall is a multipurpose facility equipped with cutting-edge technologies that provides a synergistic and interdisciplinary environment for Geospatial Information Science and Technology (GIST) education and research at UTEP. It was funded by a Faculty Science and Technology Acquisition and Retention (STARs) program grant from the UT system awarded to Dr. Jayajit Chakraborty in 2015.
